

Across all browsers I have noticed that there are little to no differences between the sites.

The screenshot shows the Microsoft Edge browser window with multiple tabs open. The active tab displays the homepage of 'Crystal Summit Lodge' with a large banner image of a mountainous landscape. The page title is 'Crystal Summit Lodge' and the sub-headline is 'Relax, Explore, Enjoy'. Below this is a paragraph of descriptive text about the resort's amenities. Two smaller images of the resort's exterior are displayed below the text.

The screenshot shows the Mozilla Firefox browser window displaying the same 'Crystal Summit Lodge' website. The layout and content are identical to the Microsoft Edge version, including the banner image, title, sub-headline, descriptive text, and two exterior images of the resort.
